

Steve Chabot Visits Addition Manufacturing Technologies

Lebanon, OH, USA August 20, 2015 - State Representative Steve Chabot Visits Addition as Part of Recent Small Business Tour

Ohio State Representative Steve Chabot, with an interest to see Ohio small businesses at work, recently visited Addition's location in Lebanon, Ohio, to learn more about their manufacturing processes.

Rep. Chabot spoke with Doug Pierson and Lonnie McGrew, talking about Addition's growth and impact on the Ohio economy. They also discussed AddisonMckee's recent merger with Eaton Leonard and how it has expanded the company's operations and impact globally.

"It was great to have Representative Chabot at our Lebanon site," said Doug Pierson, Vice President of Sales and Marketing for Addition's North American offices, "his interest in our business was gratifying and we appreciate the time he spent with us to learn more about our company, industry, and our global reach."

Rep. Chabot also toured the facility, seeing the assembly area, inventory, large CNC mills and lathes and the machining cells that manufacture consumable bend tools. He also watched the Addition eB80 CNC bending machine bend automotive exhaust tubes.

With manufacturing facilities in Ohio, California, Canada, Mexico, the United Kingdom, France, and China, Addition leads the industry in providing tube manipulation equipment, tooling, and integrated process solutions. The company primarily serves automotive, aerospace, furniture, and ship building market segments.
