

Addition Manufacturing Technologies Announces Management Changes

Lebanon, Ohio, USA March 5th, 2018- World-leading tube bending and end forming technology specialist Addition Manufacturing Technologies announces managerial promotions.

Addition Manufacturing Technologies is restructuring its global management team in order to more effectively and efficiently manage the business and drive global growth. Addition is excited to announce the following,

Mark deMeza has been promoted to Managing Director Europe with overall responsibility for all aspects of our European business. Mark joined Addition as Group CFO in September 2016 and has made an important contribution to the financial management of the business. Additionally, he is now also General Manager of the Wuxi, China operations, and will also continue as the Addition group CFO.

Philip Aspinall has been appointed as Technical Director. Philip joined Addition in 1978 and has held various positions of responsibility in sales, service and manufacturing. Acknowledged throughout the industry, Philip is a foremost expert in tube forming solutions. In his new role, Philip will be a member of the company's research and Development committee and provide vital continuity and guidance as Addition grows the machine and tooling product lines and develops advanced application solutions for our customers. With this change, Andrew Spalding succeeds Philip Aspinall as Plant Manager of the Preston operations

Doug Pierson has been promoted to VP Sales, Service, and Marketing with company-wide responsibility across all continents. Doug has been with Addition for over 25 years and was previously VP Sales for The Americas. He has been invaluable in developing and maintaining customer relationships for continued growth and market sector diversification.

Addition Manufacturing Technologies is an engineering company that specializes in providing advanced metal tube-forming technology and systems to manufacturers worldwide in the automotive, aerospace, and general industrial markets, with a focus on tube bending, end forming, measuring, and silencer making.
